6	Name of the Participants	As above
7	Report of the Event (Program Schedule and Geo Tag Photos)	Attached

International Prosthetics and Orthotics Day is observed annually on November 5th. It's a day to raise awareness about the importance of prosthetics and orthotics, and to celebrate the advancements in technology and care. It also highlights the challenges faced by people who use these devices, and the need for access to quality care and support.

On this occasion Dr. Arpita Padi, Assistant Professor, Dept of Prosthetics & Orthotics KAHER, Belagavi, delivered a talk on the clinical utility of Prosthetics & Orthotics and presented a video clip on successful stories of these.
